

# Call for Scholarship Proposals

The Check Point Institute for Information Security (CPIIS) is soliciting proposals for funding graduate students and post-doctoral fellows that perform research in all aspects of information and computer security.

Research topics include (but not limited to):

- Data, System and Network Security
- Machine learning for security
- Privacy of personal data in public databases
- Economic and social aspects of Information Security
- Human interaction and usability aspects of information security
- Cryptography and cryptographic protocols
- Hardware and embedded systems security
- Security modeling and analysis

The call is open to individuals who will be graduate students or post-doctoral fellows within any academic institution in Israel during the 2017/2018 academic year. The funding will be for one year with potential extension. (Starting date is flexible.) The money can be spent on any expense related to the project, including travel. Up to 100K NIS per proposal may be requested. Proposals for funding should contain:

- A one to two page description of the proposed research and its relevance
- CV of the proposed beneficiary
- Support letter by advisor or host
- Additional supporting material, such as letters of reference, is optional

Proposals should be sent to [cpiis@cs.tau.ac.il](mailto:cpiis@cs.tau.ac.il) no later than **May 31, 2017**. Proposers may be invited for an in person meeting for further review. Decisions will be announced no later than July 15, 2017.

Winning proposals will be expected to provide a report on the results of the funded research at the end of the funding term, or every year in case of extended funding.
